

VALERII KONDAUROV

Data Analyst, BI Analyst

Open to relocation and remote work

kondaurovvalerii@proton.me | t.me/valerii_kondaurov | github.com/ValeriKond | valerikond.github.io

SUMMARY

Data Analyst with 3+ years of commercial experience. I work with SQL, Python, dbt, Airbyte and PostgreSQL. Defined sales KPIs and plan vs actual reporting, tracked churn and retention, found revenue leaks, and built BI dashboards from scratch. Currently doing a Master's in AI at ITMO University. Looking for a remote role or relocation to an international company.

EXPERIENCE

Analyst, OTK Consulting

Jul 2024 - Present, business consulting, Saint Petersburg

- ELT and DWH: built Airbyte, dbt and PostgreSQL pipelines (raw, staging and marts layers) and moved reporting from Zoho to Metabase. Built ops and NPS dashboards; monthly revenue grew 40% over that period, to \$155k.
- Sales KPIs and plan vs actual: defined sales team KPIs and built plan vs actual reporting so managers could track performance against targets.
- Churn: calculated churn and retention rates and set up CRM alerts for managers when a client looked likely to leave. Saves over \$20,000 a year, about 1.5% of annual revenue.
- Document OCR: built document recognition from scratch with YOLOv11 (25 classes) and PaddleOCR. Detection errors went from 15% to under 1%, L1 support manual work dropped 5x, average field accuracy is 98%.
- CRM automation: connected ElevenLabs call transcription to AmoCRM and built Google Sheets automations. CRM work for 5 managers went from 1.5 hours to 30 minutes a day.
- Ad-hoc analysis: found why leads in one region dropped 20x (a Zoho import bug). Ran a price elasticity analysis before a tariff change.

Key results:

- Annual company revenue grew from \$1.1M to \$1.4M, partly through analytics and automation.
- Recovered about \$5,000 in unbilled services by finding where CRM and billing data did not match.

Intern Analyst (Operations), Tele2

Sep 2023 - Jul 2024, 11 months, telecommunications, Saint Petersburg

- Built marketing and budget KPI dashboards in FineBI; processed 10k to 16k row datasets in Power Query and pivot tables.
- Automated reports with VBA macros (over 1,000 lines of code) and documented the DWH integration process.
- Analyzed network coverage in Karelia and Saint Petersburg. Delivered a 16k-row distance calculation in 1.5 hours, 25x ahead of the deadline.
- Built automated regional KPI reports in FineBI: marketing, operations, market share.

Analyst, Global Logistic Service LLC

Mar 2023 - Aug 2023, 6 months, logistics

- Automated reporting and data checks in Google Sheets with AppScript.
- Wrote multi-source formulas (QUERY, IMPORTRANGE, VLOOKUP) to reconcile cargo arrivals and departures.
- Moved monthly and quarterly reporting to automatic collection.

EDUCATION

M.Sc. Artificial Intelligence, ITMO University, Saint Petersburg, 2025-2027 (in progress, remote)

B.Sc. World Economy and International Trade, RANEPA (SZIU), Saint Petersburg, graduated 2025

SKILLS

Programming: Python (pandas, numpy, seaborn, plotly, scikit-learn), SQL, JavaScript

Data Stack: dbt, Airbyte, PostgreSQL, MySQL, n8n, GitHub

BI and Reporting: Metabase, FineBI, Zoho Analytics, Excel (Power Query, Pivot, VBA), Google Sheets

Analytics: KPI design, plan vs actual, churn and retention, A/B testing, regression analysis
