

VALERII KONDAUROV

Data Analyst | BI Analyst

Location: Saint Petersburg, Russia — open to relocation & remote

Email: kondaurovvalerii@proton.me

Telegram: t.me/valerii_kondaurov

SUMMARY

Data Analyst with 3+ years of commercial experience turning raw data into business decisions. Hands-on with the modern data stack (dbt, Airbyte, PostgreSQL) and Python-based analytics. Track record of finding revenue leaks, automating reporting pipelines, and building BI dashboards from scratch. Currently pursuing a Master's in AI at ITMO University. Seeking a remote or relocation role at an international company.

EXPERIENCE

Analyst

OTK - Safety consulting | Jul 2024 - Present

Business consulting services, Saint Petersburg

- Architected and managed ELT pipelines (Airbyte -> dbt -> PostgreSQL DWH) structured into raw, staging, and marts layers; migrated systems from Zoho to Metabase, designing operations and NPS dashboards that supported a 40% growth in monthly revenue (to \$155k+).
- Designed a document processing system from scratch; utilized YOLOv11 for classification (25 classes with auto-rotation) and field cropping (expanding fields by 50%), and trained customized PaddleOCR models to extract text that prefills the system data clearly.
- Integrated ElevenLabs STT API with AmoCRM to automate call transcription; built Google Sheets JavaScript engines (vibe-coding) to auto-generate cold leads, reducing daily CRM overhead for the 5-manager team by 3x (from 1.5h to 30m/manager).
- Investigated marketing funnel anomalies (e.g. debugged a critical 20x regional lead drop caused by Zoho import bugs) and conducted pricing elasticity studies to support tariff changes.

Key Achievements:

- OCR System Impact: Reduced document detection errors from 15% to <1%, cutting L1 support manual processing time by 5x (average OCR accuracy boosted to 98%).
- Business Scale Growth: Provided data-driven product insights and automations that helped scale the company's annual revenue from \$1.1M to \$1.4M+ USD.
- Churn Reduction: Developed a customer retention system that flags churn-risk accounts, saving the company \$20,000+ USD/year (~1.5% of total annual revenue).
- Revenue Recovery: Reclaimed ~\$5,000 USD in unbilled services by identifying CRM-to-billing pipeline sync logic gaps.

Intern Analyst, Operations

Tele2 | Sep 2023 - Jul 2024 (11 mo)

Telecommunications, Saint Petersburg

- Processed operational datasets (10k–16k rows) using Power Query/Pivot and built interactive marketing and budget KPI dashboards in FineBI.
- Automated reporting workflows by writing VBA macros (1,000+ line codebase) and documented internal DWH integration procedures.

Key Achievements:

- Delivered a geospatial distance-calculation project (16k rows) in 1.5 hours — 25x ahead of deadline.
- Analyzed cellular network coverage across Karelia and St. Petersburg, providing data-driven recommendations on new station placements.
- Built automated interactive KPI reports (Marketing, Operational, Market Share) across multiple regions in FineBI.

Analyst - internship

Global Logistic Service LLC | Mar 2023 - Aug 2023 (6 mo)

Key Achievements:

- Automated reporting and data validation workflows in Google Sheets using AppScript (JavaScript).
- Built complex multi-source formulas (QUERY, IMPORTRANGE, VLOOKUP) for financial verification of cargo arrival/departure flows.
- Delivered monthly and quarterly reporting with automation; significantly improved team throughput.

EDUCATION

M.Sc. Artificial Intelligence

ITMO University, Saint Petersburg

2025 - 2027 | in progress | remote (Russia's premier IT and AI research university, ACM-ICPC world champions)

B.Sc. World Economy / International Trade

RANEPA (SZIU), Saint Petersburg

Graduated 2025

SKILLS

Programming: Python (pandas, numpy, seaborn, plotly, scikit-learn), SQL, JavaScript

Data Stack: dbt, Airbyte, PostgreSQL, MySQL

BI & Reporting: Metabase, FineBI, Zoho Analytics, Excel (Power Query / Pivot / VBA), Google Sheets

Other: Cron, Docker, Figma, A/B testing, regression analysis, KPI design
